The large glazed area and the large terraces ensure the stunning views of the place and the optimal use of space.

VISUAL CONTINUITY

SENSORY BALANCE

In the night area, the rooms have been designed according to the principle of sensory balance, where serenity and sobriety become priority criteria in the creation of environments and the selection of materials.

The semi basement level closes the distribution of the house with bright and wide spaces designed for leisure and rest. Outside, the garden and the pool add the cherry to this private space of enjoyment and relax.

U N L I M I T E D S P A C E S

The life in the house opens to the terrace and the garden, which dialogue with the surrounding landscape creating a unique space of visual continuity; the relationship between the interior and exterior moves us to a sensory state where the limit between the "inside" and the "outside" is completely blurred.
